- Measure how far it flies.

What steps did you use to help the rocket fly farther and farther.

How to Put the Straw Rocket Together

- Children will need to cut off a piece of the large straw about 2 and a half inches long. They will need to tape one end of the straw closed.
- Then they will need to cut out their bat picture.
- Next they can be glued or taped to the section of the large straw. The feet of the bat should be facing the taped end of the straw.
- Finally, the bat picture on the straw will need to be placed on the smaller straw.

Thank you for this download I hope your children enjoy this JDaniel4's Mom resource.
