Halloween Creatures Counting Algorithm Game Board

Connect the boxes to in order from 1-10.

Name: _____

Halloween Creatures Counting Algorithm Game Board

Connect the boxes to in order from 1-10.

How to Build Algorithms on These Game Boards

- There are a number of ways your children can complete the algorithm on the full size game boards.
- Your children will need to create a path with arrows that begins with the word Start and stops at the word End.
- The path will need to connect the numbers in order.
- Before they work on their own, you will want to go through the first few steps with them. That will ensure they know what they need to do.
- They will need to first decide what direction they will need to go to leave the Start box and head to the next number. They will draw or place an arrow in the Start box that points in the direction they need to go. Next, they will decide what direction they need to go to move to next to the box. That box will need an arrow to draw or be placed in an arrow.
- When they are finished, have your children explain their algorithm to you.

Thank you for this download I hope your children enjoy this JDaniel4's Mom resource.
